Vaporizer - Volcano

The VOLCANO Vaporizer releases flavors and active ingredients from herbs through vaporization by hot air.

Optimum treatment of the active ingredients reduces the development of harmful substances and odours to a minimum. This means that even non-smokers find the vaporizer enjoyable.

A further advantage of the VOLCANO is the exploitation of active ingredients, being 3-4 times greater when compared with smoking, an aspect which makes the investment in the device pay for itself in the shortest time possible.

After the filling the valve balloon it can be completely detached and separated from the device. The content may be inhaled at ease, independently from the vaporization process both comfortably and safely.

Set includes:

* Volcano Vaporizer Sealed In Box
* Complete 3 Yr Warranty
* Complete Volcano EASY Valve Set
* 9' Roll of Volcano Balloons
* Complete Volcano Screen Set
* 2 extra Volcano Air Filters
* Volcano Balloon Clip

Vaporizer - Volcano Digital

The advantage of the VOLCANO DIGIT lies in its large LED display, which immediately and precisely informs the user of the operating status. The VOLCANO DIGIT communicates better with the user and its electronic control system works even more precisely than the bi-metal regulator on the VOLCANO CLASSIC.

Precise electronic control:
Extra large, digital LED display with set and actual temperature. Vaporization temperature can be set between 40° and 230°C (104° and 446°F).

Temperature accuracy ± 1,5°C
Display changeover between °Celsius and °Fahrenheit
Two years warranty
Automatic switch off

Both, VOLCANO types come with a shapely, brushed metal cone. Care was taken to use tasteless materials that are food safe. Both, the high-performance heating cartridge and the strong diaphragm pump can withstand the toughest stresses and strains. An independent temperature fuse, air filter and silencer are naturally included in our VOLCANOS, as is a specially designed aluminium heating block, which brings the air both cleanly and reliably to the desired temperature.

Vaporizer - Vapir Vapormatic

Vapir has done it again with the Vapormatic deluxe vaporizer. The Vapir Vapormatic Deluxe Vaporizer is extremely stylish with its new retro look and chrome finish.
The Vapormatic deluxe vaporizers herb disk system makes this vaporizer almost completely error proof. Simply slide open the herb disk tray located on the front of the unit and place a pre filled herb disk inside and close. Now the Vapir Vapormatic Deluxe Vaporizer is ready for operation.

The Vapir Vapormatic Deluxe Vaporizer comes complete with an illuminated LCD screen on the front of the vaporizer that gives you an exact temperature the unit is operating at (+- 4 degrees Celsius).

Another feature on the Vapormatic deluxe is dual control of both the fan speed and temperature. This feature gives you the ability to adjust your heat and fan speed on the fly, while the Vapir Vapormatic Deluxe Vaporizer is still in operation.

Vaporizer - Vapir One

The Vapir Air One 5.0 vaporizer is a digital, forced air vaporizer for a great price. For those of you who are looking for a reliable unit but don’t want to spend too much, this is a solid alternative.

The Air One features three fan settings allowing the user to decide whether to inhale directly from the unit (using the low setting) or use the included balloons (using the high setting). This dual functionality on an affordable digital vaporizer is a great added bonus.

The included inflation kit comes with 5 durable reusable vapor bags that now feature a 35% larger volume. This means that you can really pack the essence of your favorite herbs into one balloon. And with the new improved heating element the vaporizer is ready for use in no time.

This efficient Vapir Air One 5.0 Vaporizer is a solid affordable unit that is dependable and offers users the versatility they seek in a quality aromatic experience.

Vaporizer - Vapir NO2

When we set out to create a newest Vapir vaporizer it had to be the next generation in vaporization technology for it to be worthy of the name Vapir. To make this leap we designed and created this unit from the ground up with the suggestions, comments and ideas our customer's had indicated they wanted in their 'dream' vaporizer. In addition we added some amazing technology and forward thinking options to create our newest addition to the Vapir lineup. With the NO2, Vapir has created a portable vaporizer the vape community has been waiting for!

* 1 Year Warranty Standard
* Internal Re-Chargeable Battery
* Set Temperature Memory Remembers Your Favorite Vaporizing Temperature!
* Easy to use out of the box
* Heats up FAST
* Utilizes a Revolutionary Stainless Steel Encased Pure Brass Heating Element that Delivers Completely Clean Heat for a Fresh and Dense Vapor!
* Digital Temperature Display Specifically Controls Temperature within 2-5 Degrees!
* Can Simultaneously Re-Charge Battery While Vaporizing!
* Fully Featured in Both Celsius and Fahrenheit
* Compact Size and Easily Portable for usage on-the-go (approx. 8 inches height x 1.5 inches wide)

Vaporizer - Vaponic

The Vaponic enables you to inhale active and/or aromatic substances of plants. You will neither be exposed to the smell nor to toxic by-products, produced by combustion. Inhaling vapour is a healthy alternative to smoking. The vaporization is achieved by a stream of hot air that extracts the substances of the plant without burning it. The vapour you inhale contains everything a plant can offer, but you avoid exposing yourself to toxic combustion by-products. A Vaponic extracts a much higher level of substances than any normal pipe can do, that´s why it pays for itself very fast. Although the vaporization is taking place near your mouth, there ´s absolutely no risk of burning yourself. The unique and patented Vaponic cooling system allows you to directly inhale to your lungs, you don´t need to store the vapour in your mouth first. Take the Vaponic with you and use it wherever you want. Its specially adapted case will protect the device against damage and annoying questions.

Vaporizer - Eagle Bill

This great product is designed by cannabis activist and vaporizer pioneer Eagle Bill to make vaporization available to everyone. He came up with the "shake and vape" based on ancient Egyptian methods of using hot stones to hold the temperature necessary to vaporize cannabis.

This great glass pipe is blown in a beautiful round shape. Easy to clean and durable (as long as it does not fall).

To use this vaporizing pipe:

* Remove the screen.
* Put your herb or marijuana in the bowl and replace the screen (grind your substance as fine as possible).
* Heat the underside of the bowl until vapor is present. To make more vapor shake your pipe carefully.

Vaporizer - Lolite

When the IOLITE was introduced in 2008, it broke the mould. It was the first truly portable vaporizer, with no cords or batteries, and an instantaneous power source. IOLITE set the standard in what smokeless freedom is all about – doing it your way when the mood takes you.

IOLITE works by heating your blend to an optimum temperature, to produce smooth, consistent vapors. IOLITE's technology means you won't burn or waste your blend, so there are no harmful chemicals to worry about and your blend lasts longer.

IOLITE revolutionised the vaporizing market, thanks to our unique and patented technology. It broke free of cords by using a butane gas power source that could last up to two hours and charged more quickly than its rivals; the heat pin ensures that your blend is heated thoroughly and used completely, so there's a consistent vapor and maximum enjoyment; and this all comes in a portable unit that can go where you and is ready with you want it.

Vaporizer - DaVinci

The DaVinci is the world's most advanced pocket vaporizer. With its sleek, stylish design, the DaVinci looks as good as it works. Featuring 3 rechargeable internal lithium ion batteries, the DaVinci is the perfect on-the-go aromatherapy device.
The adjustable temperature gives the user great flexibility. With a heat up time of approximately a minute and a half, you'll be vaping in no time and thanks to a dual on/off switch, won't accidentally power your unit on in your pocket and run down your battery.
Worried about letting your DaVinci sit and drain the battery while it's not in use? Our 10 minute cut off switch will turn off the heating element after 10 minutes of inactivity and save your battery life.
The DaVinci Vaporizer is available in several colours.Included with the DaVinci Vaporizer

* User manual
* Charger (220v, EU plug)
* Flexi-straw
* 2 oil cans

Vaporizer - WISPR 2

Oglesby & Butler - the brains behind the popular Iolite vaporizer - now introduce the upgraded WISPR model, simply named the WISPR 2. The great looks have remained unchanged, but the experience is now smoother than ever before.
The WISPR 2 is a small hand-held vaporizer that works with the same underlying technology as the iolite. The new retro design allows the heat to flow away from the unit, ensuring the WISPR 2 is cool to touch.
Other notable features include:

* Heats up within a minute to a stable temperature of 190°C (374°F)
* Easily visible fuel gauge
* Butane reservoir lasts up to 3 hours of continuous vaporization

The WISPR 2 is available in 5 colours.Components

* WISPR 2 Vaporizer. Length: 87 mm x Width: 70 mm x Depth: 29 mm. Weight: 128 g
* Quick Start Guide
* Instructions in 7 languages
* Spare mesh screen
* Carrying bag with WISPR logo
* 2 x Silicone Pop Out Mouthpiece
* 2 x Pipe Cleaner
* Warranty: 2 years provided by manufacturer

Vaporizer - Arizer Solo

The Canadian-based Arizer is a well-known and highly respected manufacturer of vaporizers, having released the Extreme-Q and V-Tower. With the Arizer Solo, the company shifts its focus to the portable vaporizer market.
The Arizer Solo is powered by a rechargeable lithium battery (lasting 3 to 4 hours) and features a multi-purpose ceramic heater with 7 temperature settings up to a maximum of 210°C. This vaporizer wasn't designed for stealth and with it's height of approximately 11 cm is one of the larger portable vaporizers, though it still fits comfortably in the palm of your hand and feels much more durable than its smaller competitors.
We always have the latest model in stock Included in the box

* Vaporizer unit
* Instruction booklet
* Charging set
* Pot pourri Dish
* 2 borosilicate tubes
* Can be used while it's charging
